Safety Data Sheet (SDS/MSDS): Aerosol Scent Spray

16-section OSHA/GHS aligned reference sheet | صحيفة بيانات سلامة مرجعية من 16 قسمًا

Product identifier	Commercial air freshener aerosol; exact formula not provided
Recommended use	Room/area fragrance spray. Do not use near ignition sources, oxygen equipment, open wounds, or food preparation surfaces unless the product label permits.
Prepared for	Al Sultan Medical Complex / مجمع السلطان الطبي
Date prepared	17 August 2026
Verification note	Product-specific composition, fragrance allergens, propellant percentage, and manufacturer emergency phone were not provided. The SDS below uses globally recognized aerosol/LPG hazards and marks product-specific fields as not verified.

1. Identification / التعريف بالمادة

Product identifier	Aerosol Scent Spray
Other means of identification	Commercial air freshener aerosol; exact formula not provided
Recommended use/restrictions	Room/area fragrance spray. Do not use near ignition sources, oxygen equipment, open wounds, or food preparation surfaces unless the product label permits.
Supplier/manufacturer	Not verified from attachments; obtain original manufacturer SDS for supplier details.
Emergency phone	Use local emergency services/poison center; product-specific number not verified.

2. Hazard(s) Identification / تحديد المخاطر

Classification	Assume pressurized flammable aerosol when hydrocarbon propellant is present: extremely flammable aerosol; pressurized container may burst if heated; possible eye/respiratory irritation from mist/fragrance.
Signal word	Danger
GHS pictograms	Flame; Gas cylinder; Exclamation mark (where irritant ingredients apply)
Hazards not otherwise classified	Commercial product-specific hazards may exist if the actual formula contains unlisted additives.

3. Composition / Information on Ingredients / التركيب والمكونات

Ingredient	CAS/Identifier	Concentration/status
Liquefied petroleum gas / propane-butane propellant	CAS 68476-85-7 or component CAS 74-98-	Not verified; common aerosol propellant

	6/106-97-8	
Fragrance mixture and solvents	Mixture	Not verified; may include sensitizers

4. First-Aid Measures / الإسعافات الأولية

- Inhalation: move person to fresh air; get medical help if breathing difficulty, dizziness, or irritation persists.
- Skin: wash with soap and water; remove contaminated clothing if wet with product.
- Eyes: rinse cautiously with water for at least 15 minutes; remove contact lenses if easy; seek care if irritation continues.
- Ingestion: rinse mouth; do not induce vomiting; contact poison center/physician if symptoms occur.

5. Fire-Fighting Measures / مكافحة الحريق

- Suitable media: dry chemical, carbon dioxide, foam, or water spray for surrounding fire.
- Specific hazards: containers can rupture or explode when heated; vapors may travel to ignition source and flash back.
- Firefighters: use SCBA and cool exposed cans with water spray from a protected location.

6. Accidental Release Measures / إجراءات الانسكاب العرضي

- Eliminate ignition sources and ventilate. Avoid breathing spray mist or vapor.
- For leaking cans, move to a safe ventilated area if this can be done without risk.
- Absorb liquid residue with non-combustible inert material and dispose according to local rules.

7. Handling and Storage / التداول والتخزين

- Keep away from heat, sparks, open flame, hot surfaces, and smoking.
- Do not pierce or burn container, even after use. Avoid spraying toward face or on skin.
- Store below 50 C, away from direct sunlight and oxidizing agents.

8. Exposure Controls / Personal Protection / التحكم بالتعرض ومعدات الوقاية

- Use general ventilation; avoid deliberate inhalation.
- For LPG: NIOSH/OSHA TWA 1000 ppm (1800 mg/m3); IDLH 2000 ppm.
- Wear eye protection and gloves during bulk handling or spill cleanup.

9. Physical and Chemical Properties / الخواص الفيزيائية والكيميائية

Appearance	Pressurized aerosol spray; liquid/mist when dispensed
Odor	Fragranced
Flash point	Not verified for product; hydrocarbon propellants are extremely flammable
Vapor pressure	Pressurized container
Solubility	Not verified; fragrance/solvent phase may be partly water insoluble

10. Stability and Reactivity / الثبات والتفاعلية

- Stable under labeled storage conditions.
- Avoid heat, flames, sparks, puncture, direct sunlight, and strong oxidizers.

11. Toxicological Information / المعلومات السمية

- High vapor concentrations may cause dizziness, drowsiness, or asphyxiation from propellant displacement of oxygen.
- Liquid propellant contact can cause frostbite.
- Fragrance ingredients may irritate or sensitize susceptible individuals; exact allergens not verified.

12. Ecological Information / المعلومات البيئية

- Do not discharge aerosol contents to drains or waterways.
- Environmental classification cannot be verified without product formula.

13. Disposal Considerations / اعتبارات التخلص

- Dispose of unused product, residues, and contaminated packaging according to Saudi/local hazardous waste and infection-control procedures.
- Do not pour concentrated hazardous chemicals to drain unless the product label, facility procedure, and local regulation allow.
- Do not mix chemical waste streams; segregate oxidizers, flammables, chlorine-releasing products, and antiseptics.

14. Transport Information / معلومات النقل

- Likely regulated as UN1950, Aerosols, Class 2.1 if flammable; verify against the actual product label/SDS.
- Transport classification can change with package size, concentration, and local modal rules; verify before shipping.

15. Regulatory Information / المعلومات التنظيمية

- Prepared to follow the 16-section SDS format used in OSHA/GHS-aligned hazard communication.
- Sections 12-15 are included for completeness although some jurisdictions treat them differently.
- This document is not a substitute for the original manufacturer SDS, label, Ministry/SFDA requirements, or facility chemical risk assessment.

16. Other Information / معلومات أخرى

Prepared by	Codex-assisted reference compilation for Al Sultan Medical Complex
Revision	1.0
Preparation date	17 August 2026
Reliability statement	Public authoritative sources were used where available; unverified commercial product data are explicitly marked.
