Safety Data Sheet (SDS/MSDS): Hand & Body Soap

16-section OSHA/GHS aligned reference sheet | صحيفة بيانات سلامة مرجعية من 16 قسمًا

Product identifier	Commercial hand/body cleansing soap; exact formula not provided
Recommended use	Hand and body washing. Cosmetic/personal-care use only as labeled.
Prepared for	Al Sultan Medical Complex / مجمع السلطان الطبي
Date prepared	17 August 2026
Verification note	Product-specific formula, preservative/fragrance list, pH, and supplier details were not provided. This file treats the product as a typical aqueous surfactant mixture and flags ingredient-specific data as not verified.

1. Identification / التعريف بالمادة

Product identifier	Hand & Body Soap
Other means of identification	Commercial hand/body cleansing soap; exact formula not provided
Recommended use/restrictions	Hand and body washing. Cosmetic/personal-care use only as labeled.
Supplier/manufacturer	Not verified from attachments; obtain original manufacturer SDS for supplier details.
Emergency phone	Use local emergency services/poison center; product-specific number not verified.

2. Hazard(s) Identification / تحديد المخاطر

Classification	Often not classified as hazardous as supplied; may cause eye irritation and skin dryness with repeated exposure. Concentrated surfactants can be irritants.
Signal word	Not classified / Warning if irritant labeling applies
GHS pictograms	None expected for many finished consumer soaps; exclamation mark may apply to concentrated surfactant ingredients
Hazards not otherwise classified	Commercial product-specific hazards may exist if the actual formula contains unlisted additives.

3. Composition / Information on Ingredients / التركيب والمكونات

Ingredient	CAS/Identifier	Concentration/status
Water	CAS 7732-18-5	Major component; not hazardous
Anionic/amphoteric	CAS varies	Not verified; common cleansing ingredient

surfactants such as sodium laureth sulfate		
Glycerol / humectants, fragrance, preservative	Mixture	Not verified

4. First-Aid Measures / الإسعافات الأولية

- Inhalation: not a normal route; move to fresh air if mist causes irritation.
- Skin: rinse if irritation occurs; discontinue use if rash develops.
- Eyes: rinse with water for several minutes; seek medical advice if pain or redness persists.
- Ingestion: rinse mouth; do not induce vomiting; obtain medical advice for large ingestion or symptoms.

5. Fire-Fighting Measures / مكافحة الحريق

- Generally aqueous and not readily flammable.
- Use media suitable for surrounding fire.
- Thermal decomposition of surfactants may produce irritating fumes.

6. Accidental Release Measures / إجراءات الانسكاب العرضي

- Small spills: wipe or mop up; wet floors can be slippery.
- Prevent large quantities from entering drains or surface water.
- Dispose in accordance with local wastewater and waste rules.

7. Handling and Storage / التداول والتخزين

- Avoid eye contact and prolonged unnecessary skin contact.
- Keep container closed when not in use.
- Store at room temperature away from excessive heat/freezing and incompatible oxidizers.

8. Exposure Controls / Personal Protection / التحكم بالتعرض ومعدات الوقاية

- No product-specific occupational limits available.
- Use normal room ventilation.
- Eye protection is recommended for bulk transfer; gloves for repeated handling or cleaning spills.

9. Physical and Chemical Properties / الخواص الفيزيائية والكيميائية

Appearance	Viscous liquid or gel; color not verified
Odor	Fragranced or characteristic; not verified
pH	Not verified; commonly mildly acidic to neutral for skin cleansers
Flash point	Not applicable/expected for aqueous product
Solubility	Dispersible/miscible in water

10. Stability and Reactivity / الثبات والتفاعلية

- Stable under normal conditions.
- Avoid strong oxidizing agents and extreme temperatures.

11. Toxicological Information / المعلومات السمية

- Finished soap may irritate eyes.
- Repeated or prolonged exposure may dry or irritate skin.
- Concentrated surfactants such as sodium laureth sulfate are reported as dermal/ocular irritants.

12. Ecological Information / المعلومات البيئية

- Avoid uncontrolled release of bulk product.
- Surfactant biodegradability and aquatic toxicity depend on formulation; not verified.

13. Disposal Considerations / اعتبارات التخلص

- Dispose of unused product, residues, and contaminated packaging according to Saudi/local hazardous waste and infection-control procedures.
- Do not pour concentrated hazardous chemicals to drain unless the product label, facility procedure, and local regulation allow.
- Do not mix chemical waste streams; segregate oxidizers, flammables, chlorine-releasing products, and antiseptics.

14. Transport Information / معلومات النقل

- Not expected to be dangerous goods as a typical aqueous finished soap; verify product label/SDS.
- Transport classification can change with package size, concentration, and local modal rules; verify before shipping.

15. Regulatory Information / المعلومات التنظيمية

- Prepared to follow the 16-section SDS format used in OSHA/GHS-aligned hazard communication.
- Sections 12-15 are included for completeness although some jurisdictions treat them differently.
- This document is not a substitute for the original manufacturer SDS, label, Ministry/SFDA requirements, or facility chemical risk assessment.

16. Other Information / معلومات أخرى

Prepared by	Codex-assisted reference compilation for Al Sultan Medical Complex
Revision	1.0
Preparation date	17 August 2026
Reliability statement	Public authoritative sources were used where available; unverified commercial product data are explicitly marked.
