Safety Data Sheet (SDS/MSDS): SOCHLOR TAP

16-section OSHA/GHS aligned reference sheet | صحيفة بيانات سلامة مرجعية من 16 قسمًا

Product identifier	Likely sodium dichloroisocyanurate disinfectant tablet; exact product label not provided
Recommended use	Chlorine-releasing disinfectant tablets for surface/equipment disinfection only as labeled.
Prepared for	Al Sultan Medical Complex / مجمع السلطان الطبي
Date prepared	17 August 2026
Verification note	The product name suggests NaDCC/chlorine tablets, but exact active chlorine content and manufacturer data were not provided. This SDS uses sodium dichloroisocyanurate dihydrate/troclosene sodium data.

1. Identification / التعريف بالمادة

Product identifier	SOCHLOR TAP
Other means of identification	Likely sodium dichloroisocyanurate disinfectant tablet; exact product label not provided
Recommended use/restrictions	Chlorine-releasing disinfectant tablets for surface/equipment disinfection only as labeled.
Supplier/manufacturer	Not verified from attachments; obtain original manufacturer SDS for supplier details.
Emergency phone	Use local emergency services/poison center; product-specific number not verified.

2. Hazard(s) Identification / تحديد المخاطر

Classification	Harmful if swallowed; causes serious eye irritation; may cause respiratory irritation; very toxic to aquatic life; may release chlorine with acids/water/incompatibles.
Signal word	Warning
GHS pictograms	Exclamation mark; Environment; Oxidizer may apply to dry chlorinated isocyanurate products depending on formulation
Hazards not otherwise classified	Commercial product-specific hazards may exist if the actual formula contains unlisted additives.

3. Composition / Information on Ingredients / التركيب والمكونات

Ingredient	CAS/Identifier	Concentration/status

Sodium dichloroisocyanurate dihydrate / troclosene sodium	CAS 51580-86-0	Assumed active ingredient; not product-verified
Effervescent/tablet excipients	Mixture	Not verified

4. First-Aid Measures / الإسعافات الأولية

- Inhalation: move to fresh air and keep at rest; seek medical attention for cough, sore throat, or breathing symptoms.
- Skin: remove contaminated clothing and rinse skin with plenty of water.
- Eyes: rinse cautiously for several minutes; remove contact lenses if easy; seek immediate medical attention.
- Ingestion: rinse mouth; do not induce vomiting; drink one or two glasses of water if conscious; obtain medical attention.

5. Fire-Fighting Measures / مكافحة الحريق

- Use water in large amounts for fire situations; cool containers.
- Do not use dry chemical or CO2 directly on decomposing chlorinated isocyanurate unless product guidance permits.
- Fire can produce chlorine and irritating/toxic gases; firefighters need SCBA.

6. Accidental Release Measures / إجراءات الانسكاب العرضي

- Avoid dust generation. Wear gloves, protective clothing, eye/face protection, and particulate respirator where dust is present.
- Keep away from acids, ammonia, reducing agents, organic material, and moisture.
- Collect dry with clean tools into dry, covered containers. Do not use sawdust or combustible absorbents.

7. Handling and Storage / التداول والتخزين

- Do not mix with acids, ammonia, other cleaners, hypochlorites, or organic materials.
- Use with ventilation and avoid breathing dust or chlorine vapors from solutions.
- Store dry, tightly closed, in original container away from heat, moisture, combustibles, and drains.

8. Exposure Controls / Personal Protection / التحكم بالتعرض ومعدات الوقاية

- No specific OSHA/NIOSH PEL for NaDCC found; control dust and chlorine release.
- Use local exhaust for dusty operations.
- Wear chemical-resistant gloves, protective clothing, safety goggles/face shield, and respirator if dust/chlorine exposure is possible.

9. Physical and Chemical Properties / الخواص الفيزيائية والكيميائية

Appearance	White/off-white tablet; chlorine odor when dissolved
pH	Not verified; solutions may be mildly acidic to neutral depending on product
Solubility	Soluble/reactive in water releasing available chlorine

Flash point	Not applicable; solid oxidizing/chlorine-releasing disinfectant
Decomposition	Can release chlorine and other toxic gases with heat, water, acids, or incompatibles

10. Stability and Reactivity / الثبات والتفاعلية

- Reacts with acids, alkaline compounds, hypochlorites, reducing agents, ammonia, organics, and moisture.
- Contact with incompatible substances can create fire/explosion hazard or chlorine gas release.

11. Toxicological Information / المعلومات السمية

- Dust may irritate respiratory tract.
- Can cause serious eye irritation/burns and skin irritation.
- Ingestion may cause sore throat, burning sensation, nausea, and other harmful effects.

12. Ecological Information / المعلومات البيئية

- Very toxic to aquatic organisms with long-lasting effects.
- Do not release tablets, powder, or concentrated solutions to drains or the environment.

13. Disposal Considerations / اعتبارات التخلص

- Dispose of unused product, residues, and contaminated packaging according to Saudi/local hazardous waste and infection-control procedures.
- Do not pour concentrated hazardous chemicals to drain unless the product label, facility procedure, and local regulation allow.
- Do not mix chemical waste streams; segregate oxidizers, flammables, chlorine-releasing products, and antiseptics.

14. Transport Information / معلومات النقل

- Dry dichloroisocyanuric acid salts may be UN2465, Class 5.1, Packing Group II; verify actual product transport classification.
- Transport classification can change with package size, concentration, and local modal rules; verify before shipping.

15. Regulatory Information / المعلومات التنظيمية

- Prepared to follow the 16-section SDS format used in OSHA/GHS-aligned hazard communication.
- Sections 12-15 are included for completeness although some jurisdictions treat them differently.
- This document is not a substitute for the original manufacturer SDS, label, Ministry/SFDA requirements, or facility chemical risk assessment.

16. Other Information / معلومات أخرى

Prepared by	Codex-assisted reference compilation for Al Sultan Medical Complex

Revision	1.0
Preparation date	17 August 2026
Reliability statement	Public authoritative sources were used where available; unverified commercial product data are explicitly marked.
