Safety Data Sheet (SDS/MSDS): Alcohol-Based Surface Disinfectant

16-section OSHA/GHS aligned reference sheet | صحيفة بيانات سلامة مرجعية من 16 قسمًا

Product identifier	Commercial alcohol-based surface disinfectant; exact formula not provided
Recommended use	Surface disinfection only as labeled. Not for skin, eyes, ingestion, medical device sterilization, or use near ignition unless label permits.
Prepared for	Al Sultan Medical Complex / مجمع السلطان الطبي
Date prepared	17 August 2026
Verification note	Alcohol identity/percentage, quaternary ammonium compounds, fragrance, and manufacturer data were not provided. This SDS uses ethanol/isopropanol hazards for alcohol-based disinfectants.

1. Identification / التعريف بالمادة

Product identifier	Alcohol-Based Surface Disinfectant
Other means of identification	Commercial alcohol-based surface disinfectant; exact formula not provided
Recommended use/restrictions	Surface disinfection only as labeled. Not for skin, eyes, ingestion, medical device sterilization, or use near ignition unless label permits.
Supplier/manufacturer	Not verified from attachments; obtain original manufacturer SDS for supplier details.
Emergency phone	Use local emergency services/poison center; product-specific number not verified.

2. Hazard(s) Identification / تحديد المخاطر

Classification	Highly flammable liquid and vapor; serious eye irritation; may cause drowsiness/dizziness. Other product-specific hazards not verified.
Signal word	Danger
GHS pictograms	Flame; Exclamation mark
Hazards not otherwise classified	Commercial product-specific hazards may exist if the actual formula contains unlisted additives.

3. Composition / Information on Ingredients / التركيب والمكونات

Ingredient	CAS/Identifier	Concentration/status
Ethanol and/or isopropanol	CAS 64-17-5 and/or 67-63-	Active solvent/disinfectant; not product-verified

	0	
Water and possible disinfectant additives	Mixture	Not verified

4. First-Aid Measures / الإسعافات الأولية

- Inhalation: move to fresh air; seek medical advice for persistent dizziness, irritation, or breathing difficulty.
- Skin: wash with water if irritation occurs; remove soaked clothing.
- Eyes: rinse with water for several minutes; seek medical advice if irritation persists.
- Ingestion: rinse mouth; do not induce vomiting; call poison center/physician.

5. Fire-Fighting Measures / مكافحة الحريق

- Use alcohol-resistant foam, dry chemical, CO2, or water spray.
- Vapors may ignite explosively and flash back.
- Cool containers and use SCBA for firefighting.

6. Accidental Release Measures / إجراءات الانسكاب العرضي

- Eliminate ignition sources; ventilate area.
- Absorb with inert non-combustible material using non-sparking tools.
- Prevent entry into drains and collect as flammable waste.

7. Handling and Storage / التداول والتخزين

- Use away from ignition sources and energized equipment unless product label permits.
- Allow surfaces to dry before reintroducing ignition sources.
- Store in a cool, well-ventilated flammable-liquid area away from oxidizers.

8. Exposure Controls / Personal Protection / التحكم بالتعرض ومعدات الوقاية

- Ethanol: NIOSH/OSHA TWA 1000 ppm (1900 mg/m3).
- Isopropanol: NIOSH/OSHA TWA 400 ppm (980 mg/m3); STEL 500 ppm (1225 mg/m3).
- Use ventilation; wear splash goggles and chemical-resistant gloves during bulk use.

9. Physical and Chemical Properties / الخواص الفيزيائية والكيميائية

Appearance	Liquid or spray; color not verified
Odor	Alcohol/characteristic
Flash point	Not product-verified; expected flammable for high alcohol content
Solubility	Miscible/dispersible in water
Evaporation	Fast relative to water

10. Stability and Reactivity / الثبات والتفاعلية

- Stable under normal conditions.
- Avoid heat, sparks, flames, static discharge, and strong oxidizing agents.

11. Toxicological Information / المعلومات السمية

- Eye contact causes irritation.
- Inhalation of high vapor concentrations may cause CNS depression.
- Ingestion can cause alcohol poisoning.

12. Ecological Information / المعلومات البيئية

- Prevent bulk release to drains/waterways.
- Alcohols are generally biodegradable/volatile; additives may alter environmental hazard.

13. Disposal Considerations / اعتبارات التخلص

- Dispose of unused product, residues, and contaminated packaging according to Saudi/local hazardous waste and infection-control procedures.
- Do not pour concentrated hazardous chemicals to drain unless the product label, facility procedure, and local regulation allow.
- Do not mix chemical waste streams; segregate oxidizers, flammables, chlorine-releasing products, and antiseptics.

14. Transport Information / معلومات النقل

- Likely flammable liquid, Class 3; UN1170 or UN1219 may apply depending on alcohol type and concentration; verify product SDS.
- Transport classification can change with package size, concentration, and local modal rules; verify before shipping.

15. Regulatory Information / المعلومات التنظيمية

- Prepared to follow the 16-section SDS format used in OSHA/GHS-aligned hazard communication.
- Sections 12-15 are included for completeness although some jurisdictions treat them differently.
- This document is not a substitute for the original manufacturer SDS, label, Ministry/SFDA requirements, or facility chemical risk assessment.

16. Other Information / معلومات أخرى

Prepared by	Codex-assisted reference compilation for Al Sultan Medical Complex
Revision	1.0
Preparation date	17 August 2026
Reliability statement	Public authoritative sources were used where available; unverified commercial product data are explicitly marked.
