Safety Data Sheet (SDS/MSDS): Betadine

16-section OSHA/GHS aligned reference sheet | صحيفة بيانات سلامة مرجعية من 16 قسمًا

Product identifier	Povidone-iodine antiseptic solution; brand/product concentration not provided
Recommended use	Topical antiseptic/skin preparation only as labeled. Avoid eyes unless product is specifically ophthalmic; avoid repeated extensive use without clinical direction.
Prepared for	Al Sultan Medical Complex / مجمع السلطان الطبي
Date prepared	17 August 2026
Verification note	Brand concentration, excipients, and manufacturer SDS were not provided. Betadine is commonly povidone-iodine; this SDS uses povidone-iodine data and flags product-specific fields as unverified.

1. Identification / التعريف بالمادة

Product identifier	Betadine
Other means of identification	Povidone-iodine antiseptic solution; brand/product concentration not provided
Recommended use/restrictions	Topical antiseptic/skin preparation only as labeled. Avoid eyes unless product is specifically ophthalmic; avoid repeated extensive use without clinical direction.
Supplier/manufacturer	Not verified from attachments; obtain original manufacturer SDS for supplier details.
Emergency phone	Use local emergency services/poison center; product-specific number not verified.

2. Hazard(s) Identification / تحديد المخاطر

Classification	May cause skin irritation; causes serious eye damage/irritation in reported classifications; may harm aquatic life; iodine exposure considerations for thyroid-sensitive patients.
Signal word	Danger / Warning depending on product concentration
GHS pictograms	Corrosion; Exclamation mark; Environment may apply for concentrated product
Hazards not otherwise classified	Commercial product-specific hazards may exist if the actual formula contains unlisted additives.

3. Composition / Information on Ingredients / التركيب والمكونات

Ingredient	CAS/Identifier	Concentration/status
Povidone-iodine	CAS varies; iodine complex	Active ingredient; exact percentage not provided

Water/excipients	Mixture	Not verified

4. First-Aid Measures / الإسعافات الأولية

- Inhalation: not expected in normal use; move to fresh air if mist causes irritation.
- Skin: intended for external skin use; rinse and discontinue if irritation, dermatitis, or allergy occurs.
- Eyes: rinse cautiously with water for several minutes; seek immediate medical advice unless product is labeled ophthalmic and used as directed.
- Ingestion: rinse mouth; do not induce vomiting; seek medical advice.

5. Fire-Fighting Measures / مكافحة الحريق

- Use media suitable for surrounding fire.
- Fire may produce irritating or toxic iodine-containing fumes.
- Firefighters should use SCBA where fumes are present.

6. Accidental Release Measures / إجراءات الانسكاب العرضي

- Wear gloves and eye protection.
- Absorb with inert material and place in waste container.
- Prevent bulk release to drains or waterways.

7. Handling and Storage / التداول والتخزين

- Use only as directed; avoid repeated large-area application unless clinically indicated.
- Avoid contact with eyes, mucous membranes, or thyroid-sensitive patients unless label/clinician permits.
- Store dry/well closed or tightly closed in a cool, ventilated place as product form requires.

8. Exposure Controls / Personal Protection / التحكم بالتعرض ومعدات الوقاية

- No product-specific workplace exposure limit available.
- For iodine/iodides, referenced TLVs may apply to airborne iodine species; avoid aerosolization.
- Wear gloves and eye protection for bulk handling.

9. Physical and Chemical Properties / الخواص الفيزيائية والكيميائية

Appearance	Brown solution or yellow-brown powder depending on product; exact form not verified
Odor	Characteristic iodine odor
pH	Not verified; aqueous solutions may be acidic
Solubility	Aqueous product/complex; product-specific
Flash point	Not expected for aqueous solution; not verified

10. Stability and Reactivity / الثبات والتفاعلية

- Stable under recommended storage.
- Avoid strong reducing agents, alkalis, and incompatible chemicals; iodine may stain and react with some materials.

11. Toxicological Information / المعلومات السمية

- May cause skin irritation or dermatitis with repeated exposure.
- Iodine absorption can be clinically relevant with repeated/extensive application, neonates, pregnancy/lactation, burns, mucosal exposure, or thyroid disorders.
- Eye exposure can cause serious injury depending on concentration/formulation.

12. Ecological Information / المعلومات البيئية

- Reported classifications include aquatic chronic hazard for povidone-iodine notifications.
- Prevent concentrated product from entering waterways.

13. Disposal Considerations / اعتبارات التخلص

- Dispose of unused product, residues, and contaminated packaging according to Saudi/local hazardous waste and infection-control procedures.
- Do not pour concentrated hazardous chemicals to drain unless the product label, facility procedure, and local regulation allow.
- Do not mix chemical waste streams; segregate oxidizers, flammables, chlorine-releasing products, and antiseptics.

14. Transport Information / معلومات النقل

- Often not regulated as dangerous goods for dilute aqueous antiseptic solutions; verify actual product concentration and package.
- Transport classification can change with package size, concentration, and local modal rules; verify before shipping.

15. Regulatory Information / المعلومات التنظيمية

- Prepared to follow the 16-section SDS format used in OSHA/GHS-aligned hazard communication.
- Sections 12-15 are included for completeness although some jurisdictions treat them differently.
- This document is not a substitute for the original manufacturer SDS, label, Ministry/SFDA requirements, or facility chemical risk assessment.

16. Other Information / معلومات أخرى

Prepared by	Codex-assisted reference compilation for Al Sultan Medical Complex
Revision	1.0
Preparation date	17 August 2026

Reliability statement	Public authoritative sources were used where available; unverified commercial product data are explicitly marked.
