Safety Data Sheet (SDS/MSDS): Hydrogen Peroxide 6%

16-section OSHA/GHS aligned reference sheet | صحيفة بيانات سلامة مرجعية من 16 قسمًا

Product identifier	Hydrogen peroxide aqueous solution 6%; exact product label not provided
Recommended use	Disinfectant/cleaning/antiseptic use only as labeled. Do not mix with other chemicals.
Prepared for	Al Sultan Medical Complex / مجمع السلطان الطبي
Date prepared	17 August 2026
Verification note	Concentration is taken from the material name. Stabilizers, pH, manufacturer data, and exact regulatory classification were not provided.

1. Identification / التعريف بالمادة

Product identifier	Hydrogen Peroxide 6%
Other means of identification	Hydrogen peroxide aqueous solution 6%; exact product label not provided
Recommended use/restrictions	Disinfectant/cleaning/antiseptic use only as labeled. Do not mix with other chemicals.
Supplier/manufacturer	Not verified from attachments; obtain original manufacturer SDS for supplier details.
Emergency phone	Use local emergency services/poison center; product-specific number not verified.

2. Hazard(s) Identification / تحديد المخاطر

Classification	Oxidizing/irritant solution; may cause serious eye damage/irritation; skin and respiratory irritation possible. Higher concentrations have stronger oxidizer/corrosive hazards.
Signal word	Warning / Danger depending on exact classification
GHS pictograms	Exclamation mark; Corrosion may apply; Oxidizer may apply depending on concentration/regime
Hazards not otherwise classified	Commercial product-specific hazards may exist if the actual formula contains unlisted additives.

3. Composition / Information on Ingredients / التركيب والمكونات

Ingredient	CAS/Identifier	Concentration/status
Hydrogen peroxide	CAS 7722-84-1	6%; stated by material name

Water and stabilizers	CAS 7732-18-5 / mixture	Approx. balance; stabilizers not verified

4. First-Aid Measures / الإسعافات الأولية

- Inhalation: move to fresh air; seek medical attention if cough, irritation, or breathing difficulty persists.
- Skin: remove contaminated clothing and rinse with water; whitening/irritation may occur.
- Eyes: rinse immediately with water for at least 15 minutes; seek medical attention.
- Ingestion: rinse mouth; do not induce vomiting; seek medical advice.

5. Fire-Fighting Measures / مكافحة الحريق

- Hydrogen peroxide is not combustible but can intensify fire by oxygen release.
- Use water spray/flooding quantities for surrounding fire and to cool containers.
- Firefighters should wear SCBA; avoid contamination of containers.

6. Accidental Release Measures / إجراءات الانسكاب العرضي

- Ventilate and wear gloves/eye protection.
- Dilute small spills cautiously with large amounts of water if permitted; absorb with inert non-combustible material.
- Do not return spilled material to original container; avoid contamination with organics/metals.

7. Handling and Storage / التداول والتخزين

- Avoid contact with eyes, skin, and clothing.
- Do not mix with acids, bases, bleach, reducing agents, metals, or organic materials.
- Store cool, vented/tightly closed as product container requires, protected from light and contamination.

8. Exposure Controls / Personal Protection / التحكم بالتعرض ومعدات الوقاية

- NIOSH/OSHA TWA for hydrogen peroxide: 1 ppm (1.4 mg/m3).
- Use local ventilation if mist/vapor may form.
- Wear chemical splash goggles, compatible gloves, and protective clothing for bulk handling.

9. Physical and Chemical Properties / الخواص الفيزيائية والكيميائية

Appearance	Clear colorless liquid
Odor	Slightly sharp/characteristic; often odorless at dilute concentration
pH	Not verified; often acidic for stability
Solubility	Miscible with water
Flash point	Not combustible
Decomposition	Decomposes to water and oxygen; accelerated by heat, light, metals, contamination

10. Stability and Reactivity / الثبات والتفاعلية

- Reactive oxidizer; decomposes with heat, light, metals, alkalis, organics, and contamination.
- Oxygen release can pressurize containers and intensify combustion.

11. Toxicological Information / المعلومات السمية

- Eye contact can cause serious irritation or injury.
- Skin contact may cause irritation and temporary whitening.
- Mist inhalation can irritate nose, throat, and respiratory tract.

12. Ecological Information / المعلومات البيئية

- Breaks down to water and oxygen, but concentrated releases can harm aquatic organisms by local oxidative effects.
- Prevent uncontrolled discharge of bulk product.

13. Disposal Considerations / اعتبارات التخلص

- Dispose of unused product, residues, and contaminated packaging according to Saudi/local hazardous waste and infection-control procedures.
- Do not pour concentrated hazardous chemicals to drain unless the product label, facility procedure, and local regulation allow.
- Do not mix chemical waste streams; segregate oxidizers, flammables, chlorine-releasing products, and antiseptics.

14. Transport Information / معلومات النقل

- Hydrogen peroxide solution transport classification depends on concentration. Many lower-concentration solutions may be less regulated than >8% or >20% products; verify actual product SDS and local transport rules.
- Transport classification can change with package size, concentration, and local modal rules; verify before shipping.

15. Regulatory Information / المعلومات التنظيمية

- Prepared to follow the 16-section SDS format used in OSHA/GHS-aligned hazard communication.
- Sections 12-15 are included for completeness although some jurisdictions treat them differently.
- This document is not a substitute for the original manufacturer SDS, label, Ministry/SFDA requirements, or facility chemical risk assessment.

16. Other Information / معلومات أخرى

Prepared by	Codex-assisted reference compilation for Al Sultan Medical Complex
Revision	1.0
Preparation date	17 August 2026

Reliability statement	Public authoritative sources were used where available; unverified commercial product data are explicitly marked.
