Safety Data Sheet (SDS/MSDS): Ultrasonic Gel

16-section OSHA/GHS aligned reference sheet | صحيفة بيانات سلامة مرجعية من 16 قسمًا

Product identifier	Commercial ultrasound transmission gel; exact formula not provided
Recommended use	Coupling gel for diagnostic ultrasound probes and intact skin only as labeled. Not for injection, ingestion, eyes, sterile procedures, or damaged skin unless product is specifically labeled sterile and appropriate.
Prepared for	Al Sultan Medical Complex / مجمع السلطان الطبي
Date prepared	17 August 2026
Verification note	Product-specific composition, preservative system, sterility status, pH, viscosity, microbial limits, and manufacturer data were not provided. This SDS treats the material as a typical aqueous ultrasound gel containing water, humectants such as propylene glycol/glycerol, thickener, and preservative, and marks all product-specific data as not verified.

1. Identification / التعريف بالمادة

Product identifier	Ultrasonic Gel
Other means of identification	Commercial ultrasound transmission gel; exact formula not provided
Recommended use/restrictions	Coupling gel for diagnostic ultrasound probes and intact skin only as labeled. Not for injection, ingestion, eyes, sterile procedures, or damaged skin unless product is specifically labeled sterile and appropriate.
Supplier/manufacturer	Not verified from attachments; obtain original manufacturer SDS for supplier details.
Emergency phone	Use local emergency services/poison center; product-specific number not verified.

2. Hazard(s) Identification / تحديد المخاطر

Classification	Typically not classified as hazardous as supplied. May cause mild eye irritation, skin irritation in sensitive users, or slip hazard if spilled. Preservative allergy cannot be assessed without the formula.
Signal word	Not classified / No signal word expected for many finished gels
GHS pictograms	None expected for many finished aqueous gels; verify actual product SDS
Hazards not otherwise classified	Commercial product-specific hazards may exist if the actual formula contains unlisted additives.

3. Composition / Information on Ingredients / التركيب والمكونات

Ingredient	CAS/Identifier	Concentration/status
Water	CAS 7732-18-5	Major component; not hazardous
Propylene glycol / glycerol humectants	CAS 57-55-6 / 56-81-5	Common gel ingredients; not product-verified
Carbomer/cellulose thickener, preservative, colorant	Mixture	Not verified; preservative sensitivity possible

4. First-Aid Measures / الإسعافات الأولية

- Inhalation: not expected under normal use; move to fresh air if aerosol/mist exposure causes irritation.
- Skin: intended for intact skin; wipe off and wash with water if irritation, rash, or sensitivity occurs.
- Eyes: rinse cautiously with water for several minutes; seek medical advice if irritation persists.
- Ingestion: rinse mouth; do not induce vomiting; seek medical advice if a significant amount is swallowed or symptoms occur.

5. Fire-Fighting Measures / مكافحة الحريق

- Aqueous gel is not expected to be readily flammable.
- Use extinguishing media suitable for surrounding fire.
- Thermal decomposition of organic humectants/thickeners may generate irritating fumes; firefighters should use SCBA in significant fires.

6. Accidental Release Measures / إجراءات الانسكاب العرضي

- Spilled gel creates a significant slip hazard; restrict access and clean promptly.
- Wipe, scrape, or absorb with inert material and wash the area with water/detergent.
- Prevent large bulk releases from entering drains or waterways if preservative/additive content is unknown.

7. Handling and Storage / التداول والتخزين

- Use clean dispensing practice to avoid microbial contamination of containers and probes.
- Do not return used gel to the container; close container after use.
- Store at room temperature in original container away from excessive heat, freezing, direct sunlight, and incompatible strong oxidizers.

8. Exposure Controls / Personal Protection / التحكم بالتعرض ومعدات الوقاية

- No product-specific occupational exposure limits available.
- Glycerin mist has OSHA limits of 15 mg/m3 total particulate and 5 mg/m3 respirable fraction, relevant only if mist/aerosol is generated.
- Use normal room ventilation. Wear gloves/eye protection for bulk cleanup or if skin sensitivity is present.

9. Physical and Chemical Properties / الخواص الفيزيائية والكيميائية

Appearance	Clear or colored viscous gel; exact color not verified
Odor	Odorless or mild; not verified
pH	Not verified; ultrasound gels are commonly near skin-compatible pH
Flash point	Not expected for aqueous gel; product value not verified
Solubility	Water dispersible
Viscosity	High viscosity gel; exact value not verified

10. Stability and Reactivity / الثبات والتفاعلية

- Stable under normal storage and use.
- Avoid strong oxidizing agents, contamination, excessive heat, freezing, and direct sunlight.

11. Toxicological Information / المعلومات السمية

- Low acute toxicity expected for typical aqueous gel ingredients such as propylene glycol and glycerol.
- Eye contact may sting or irritate.
- Skin irritation or allergic reaction may occur in sensitive persons, especially from preservatives/fragrance/colorants if present.
- Contaminated non-sterile gel may present infection risk if used on non-intact skin or invasive/sterile procedures.

12. Ecological Information / المعلومات البيئية

- Expected low environmental hazard for small amounts of typical aqueous gel.
- Avoid bulk discharge to waterways; preservative and additive aquatic data are not product-verified.

13. Disposal Considerations / اعتبارات التخلص

- Dispose of unused product, residues, and contaminated packaging according to Saudi/local hazardous waste and infection-control procedures.
- Do not pour concentrated hazardous chemicals to drain unless the product label, facility procedure, and local regulation allow.
- Do not mix chemical waste streams; segregate oxidizers, flammables, chlorine-releasing products, and antiseptics.

14. Transport Information / معلومات النقل

- Not expected to be regulated as dangerous goods for a typical aqueous ultrasound gel; verify actual product SDS and package.
- Transport classification can change with package size, concentration, and local modal rules; verify before shipping.

15. Regulatory Information / المعلومات التنظيمية

- Prepared to follow the 16-section SDS format used in OSHA/GHS-aligned hazard communication.
- Sections 12-15 are included for completeness although some jurisdictions treat them differently.
- This document is not a substitute for the original manufacturer SDS, label, Ministry/SFDA requirements, or facility chemical risk assessment.

16. Other Information / معلومات أخرى

Prepared by	Codex-assisted reference compilation for Al Sultan Medical Complex
Revision	1.0
Preparation date	17 August 2026
Reliability statement	Public authoritative sources were used where available; unverified commercial product data are explicitly marked.
